

Bio

Hi! I'm Nguyen

UI/UX Designer · 3D Visual · Developer

I am a product designer and FE developer based in Ho Chi Minh City, specializing in crafting end-to-end digital products from user research and UI/UX design to building fully functional.

I also leverage AI-powered vibe coding to build browser extensions and productivity tools that streamline my daily workflow. This allows me to turn ideas into working solutions at speed, bridging the gap between design thinking and engineering execution.

Experience

2023-2026

Software Development Specialist - Tam Anh Hospital

Designed UI/UX for internal software systems including coordination platforms, medical records management, and patient file systems. Built and implemented RAG Flow solutions to support hospital workflows and enhance operational efficiency.

2022-2023

UI/UX Designer - TPF Vietnam

A significant portion of my work here revolves around crafting website marketing campaigns, developing 3D mockups, and building small CRUD apps using Sveltekit - a JavaScript framework that aligns with my skill set and interests.

2021-2022

Designer & Developer - Coconut Group

I provided effective solutions and defined the style orientation for a startup brand, as well as producing social media products, and building a website based on WordPress and Haravan.

2013-2021

Graphic Designer - TPF Vietnam

I have a significant tenure at TPF Vietnam, where I held various positions such as graphic designer, high-end retoucher, 3D visualizer, and web designer. I also aided the business in resolving automation issues to enhance efficiency.

2012-2013

UI/UX - SGVN

Since the concept of UI/UX was rather unfamiliar in Vietnam at that time, I began to build websites and apps using Photoshop, which took ten times longer to complete compared to the existing Figma. I also broadened my understanding of CSS and HTML.

2021-2022

Graphic Designer - Golden ACE Viet Nam

I acquired a wealth of knowledge regarding design methods that utilize CNC machining during. Moreover, I gained invaluable experience in communication design for social media platforms.
